

Lingyun Yang (杨凌云)

Updated March 27, 2025

Email: lyangbk@cse.ust.hk **GitHub:** [mental2008](https://github.com/mental2008) **LinkedIn:** [stephenyang1999](https://www.linkedin.com/in/stephenyang1999)
Phone: (+86) 135-0284-6103 **Office:** BDI 101, UC, HKUST **Web:** <https://www.lingyunyang.com/>

RESEARCH
INTERESTS I have a broad interest in resource management for large-scale data centers. Specifically, my research focuses on: (a) improving *resource efficiency* for AI/GPU clusters; (b) building *efficient* and *low-cost* AI model serving systems. My first-authored papers have been published in top-tier systems conferences (NSDI, ATC, SoCC).

PROFESSIONAL
EXPERIENCE **Alibaba Group** Hangzhou, China
Technology Risk and Efficiency (TRE) – Cluster Management – AI Infrastructure
Senior Software Engineer (P7) Oct. 2025 – Present
◊ Director: Dr. Yinghao Yu

EDUCATION **Hong Kong University of Science and Technology (HKUST)**
Department of Computer Science and Engineering
Ph.D. in Computer Science and Engineering Sep. 2020 – Present
◊ Advisor: Prof. Wei Wang (expected to graduate in Fall 2025)

South China University of Technology (SCUT)
School of Computer Science and Engineering
B.Eng. in Computer Science and Technology Sep. 2016 – Jul. 2020
◊ Studied at All-English Innovation Class (GPA: 3.82/4); National Scholarship.

INTERNSHIP	Alibaba Group & Alibaba Cloud <i>Technology Risk and Efficiency (TRE) – Cluster Management – AI Infrastructure</i> Research Intern ♦ Mentor: Dr. Yinghao Yu	Hangzhou, China Dec. 2020 – Present
2024 – 2024	<u>Efficient Text-to-Image Diffusion Model Serving with Add-on Modules</u> ♦ Developed SwiftDiffusion, a system that efficiently generates high-quality images with stable diffusion models and add-on modules (i.e., ControlNets and LoRAs). ♦ Analyzed usage patterns of various add-on modules (ControlNets, LoRAs) based on 500k request traces from production text-to-image services. ♦ Incorporated several novel system designs, e.g., ControlNet-as-a-Service, async bounded LoRA loading, latent parallelism for CFG computation. ♦ Achieved up to 7.8× in serving latency and 1.6× in throughput. ♦ One paper is in submission and under review [arXiv].	
2022 – 2023	<u>GPU-Disaggregated Serving for Deep Learning Recommendation Models</u> ♦ Proposed a GPU-disaggregated DLRM serving system to eliminate <i>resource mismatch</i> and meet <i>elastic</i> demand; leveraged RDMA network to offload computation on separate GPU and CPU nodes; resource-aware graph partitioning; topology-aware scheduling. ♦ In daily scenarios (e.g., a crowded GPU cluster with > 90% allocation rate), reduced CPU fragments by 53% and GPU fragments by 27% . In the Double 11 Shopping Festival, saved up to 90% of GPUs when loaning GPU servers from training clusters. ♦ One paper was accepted by NSDI ’25 .	
2022 – 2023	<u>Resource Fragmentation Analysis and Optimization for GPU-Sharing Clusters</u> ♦ Formally quantified <i>statistical GPU resource fragments</i> and proposed the <i>fragmentation gradient descent</i> scheduling algorithm to reduce resource fragmentation. Our scheduling policy can significantly reduce <i>unallocated</i> GPUs by up to 49% compared to state-of-the-art policies. [code] [trace]	

- ◇ Developed ParaSet, a *best-effort* workload on Kubernetes that dynamically adjusts the number of instances and resource requirements based on the real-time resource availability in the cluster. It aims to fill resource fragments in the cluster and is integrated into KubeDL for internal use.

- ◇ One paper was accepted by ATC '23.

2021 – 2022

Large-Scale GPU Sharing and Overcommitment in Production

- ◇ Enabled *large-scale GPU sharing and overcommitment* in production clusters, with *tens of thousands* of *shared* GPU containers running daily. Support the co-location of GPU tasks with different priorities (e.g., *latency-sensitive*, *spot*, *best-effort*).

- ◇ Specifically, I designed and implemented the *node-level* agent and the *cluster-level* controller. The agent periodically collects and reports resource usage metrics and *dynamically* allocates GPU resources to containers. The controller calculates potential resource overcommitment and provides scheduling guidance to the cluster scheduler.

2020 – 2021

Fast, Near-Optimal Auto-Configuration for Cloud-Native Model Serving

- ◇ Developed Morphling, an auto-configuration framework for AI serving on Kubernetes; combined *meta-learning* and *bayesian optimization* to quickly find the *optimal* resource configuration (e.g., CPU cores, GPU timeshare, GPU memory, GPU type) and runtime parameters (e.g., batch size). [\[code\]](#)

- ◇ It was widely used in Alibaba for automated recommendation of container resource specifications; part of Alibaba's open-sourced KubeDL, a CNCF sandbox project.

- ◇ One paper was accepted by SoCC '21.

Microsoft Research Asia (MSRA)

Beijing, China

Research Intern, *Innovation Engineering Group (IEG)*

Jul. 2019 – Jun. 2020

- ◇ Mentors: Lewei Lu & Chong Li

- ◇ Designed a novel pooling layer to enhance the robustness of image recognition models; built Neural Architecture Search (NAS) workflow for face recognition tasks; implemented various attention modules for face recognition models on CNTK.

- ◇ Star of Tomorrow Internship Award of Excellence.

AWARDS

- ◇ USENIX NSDI 2025 Student Grant

Mar. 2025

- ◇ Postgraduate Scholarship

2020 – 2024, HKUST

- ◇ Star of Tomorrow Internship Award of Excellence

Jul. 2020, MSRA

- ◇ Merit Student & Excellent Student Cadre

Nov. 2019, SCUT

- ◇ National Scholarship

Oct. 2019, China

- ◇ Silver Medal, ICPC China Xi'an National Invitational Contest

May 2019

- ◇ First Prize, 17th Guangdong Collegiate Programming Contest

May 2019

- ◇ Silver Medal, 37Games Cup Programming Contest

Apr. 2019

- ◇ Gold Medal, SCUT ACM Programming Contest

Apr. 2019

- ◇ Bronze Medal, ACM-ICPC Asia Xuzhou Regional Contest

Oct. 2018

- ◇ Silver Medal, 1st Xiao Mi Collegiate Programming Contest

Sep. 2018

	<ul style="list-style-type: none"> ◇ Gold Medal, SCUT ACM Programming Contest Apr. 2018 ◇ The First Prize Scholarship Nov. 2017, SCUT ◇ Bronze Medal, ACM-ICPC Asia Xian Regional Contest Oct. 2017 ◇ Gold Medal, 12th China Youth Robot Competition Jul. 2012 ◇ Champion, RoboCup Youth Robot World Cup, China Division Mar. 2012
